Info AKTIVITI...

MAJLIS : Karnival Sains & Pameran Sainstis Remaja

ANJURAN : Muzium & Galeri Tuanku Fauziah, USM

KOLABORATIF : JPN Negeri Pulau Pinang, Dr. Chong Hon Yew, Dr. Kim Phaik Lah, Petrosains-PlaySmart, RedGuard Creations, Perseid Telescope, Pusat Pengajian Sains Fizik USM, Kolej Matrikulasi Pulau Pinang, Penang Free School, SMKA Al-Mashoor (L), SMKA (P) Al-Mashoor, SMKA Al-Irshad, SMJK Chung Ling, SMS Tun Syed Sheh Shahabudin, SMJK Chung Ling Butterworth, MRSM Balik Pulau, SM Teknik Tuanku Abdul Rahman Putra, Cetree USM & Pusat Penyelidikan Arkeologi Malaysia.

MATLAMAT : Mengetengah & mempamerkan projek projek Sains sekolah yang dirasakan dapat membantu meningkatkan kesedaran dan menimbulkan minat di kalangan pelajar serta masyarakat terhadap dunia sains dan hubungannya dengan kreativiti, budaya serta kehidupan lestari.

LOKASI : Muzium & Galeri Tuanku Fauziah, USM

TARIKH : 20 – 22 Jun 2008 (Jumaat – Ahad)

KUMPULAN SASARAN : Pelajar Sekolah Sekitar Pulau Pinang

JUMLAH PENGUNJUNG : 1321 Orang

ProLoG AKTIVITI...

PENDIDIKAN UNTUK PEMBANGUNAN LESTARI

“USM berhasrat untuk menerajui dan memupuk aktiviti sedia ada yang berkaitan dengan pembangunan lestari melalui penyelidikan, sumbangan pelajar dan kerjasama dengan masyarakat luar menerusi beberapa fasa dan berkonsepkan ‘membawa dalaman ke luar’, iaitu membawa dan mempelajari bersama berdasarkan kepakaran dalaman dan masyarakat untuk kebaikan sejagat.

Usaha ini akan menjadikan USM sebagai contoh jalinan hubungan antara institusi Pengajian Tinggi dengan masyarakat dengan kegigihan usaha yang berterusan demi mencapai pembangunan lestari untuk kebaikan generasi akan datang.”

WARISAN SAINS & SENI UNTUK PEMBANGUNAN LESTARI

Majlis perasmian...

PERASMIAN OLEH :

Yang terhormat Tuan Haji Fadhilah Bin Haji Yusof

Timbalan Menteri Sains, Teknologi & Inovasi

Kementerian Sains, Teknologi & inovasi Malaysia

Tentatif Majlis...

HARI PERTAMA [20 JUN 2008, JUMAAT]

9.00 pagi : Pendaftaran Peserta Bengkel

10.00 pagi : Majlis Perasmian

11.00 pagi :

BENGKEL PENULISAN PERSEMBAHAN PROJEK

Dr. Kim Phaik Lah [Vision Academy]

Aktiviti-aktiviti sepanjang hari:

- Pameran Saintis Remaja
- Pameran Sains oleh Pertosains – PlaySmart
- Tayangan Filem Cereka Sains
- PertunjukanAlatan Sains Baru MGTF USM
- Persembahan Planetarium
- Demo Perubatan Sains Alternatif – ‘ Kristal Healing’
- Pameran Kostum Cereka Sains oleh RedGuard Creations
- Pameran Alatan Sains Islam – IQRA Garden of Wisdom
- Pameran Sains – Manipulasi Tenaga Solar, Cetree USM
- Pameran Terbuka di P.P Arkeologi Malaysia

12.30 tgh : Solat Jumaat

3.30 ptg :

BICARA ILMU

Rahsia Sains dalam Al-Quran

Ustaz Haji Shahul Hamid Bin M.P.H Seeni Mohammad

Pengasas & Pengarah Madrasah Darul Tahzib

Teluk Kumbar Pulau Pinang, Malaysia

9.00 mlm : Persembahan Laser & Cerapan Bintang

BENGKEL PENULISAN PERSEMBAHAN PROJEK...

HARI PERTAMA [20 JUN 2008, JUMAAT]

SYARAHAN OLEH :

Dr. Kim Phaik Lah [Vision Academy]

Bicara ilmu – rahsia sains dalam al-quran...

HARI PERTAMA [20 JUN 2008, JUMAAT]

PENCERAMAH :

Ustaz Haji Shahul Hamid Bin M.P.H Seeni Mohammad

Pengasas & Pengarah Madrasah Darul Tahzib

Teluk Kumbar Pulau Pinang, Malaysia

Bengkel & demo Fizik...

PENCERAMAH :

Dr. Chong Hon Yew

Pusat Pengajian Sains Fizik USM

Tentatif Majlis...

HARI KEDUA [21 JUN 2008, SABTU]

9.00 pagi : Pameran dibuka kepada orang ramai

10.30 pagi :

BENGKEL & DEMO FIZIK

Dr. Chong Hon Yew [Pusat Pengajian Sains Fizik USM]

Aktiviti-aktiviti sepanjang hari:

- Pameran Saintis Remaja
- Pameran Sains olehertosains – PlaySmart
- Tayangan Filem Cereka Sains
- PertunjukanAlatan Sains Baru MGTF USM
- Persembahan Planetarium & 'spectroheliroscope'
- Pameran Kostum Cereka Sains oleh RedGuard Creations
- Pencerapan Matahari
- Pameran Alatan Sains Islam – IQRA Garden of Wisdom
- Demo Batik
- Pameran Sains – Manipulasi Tenaga Solar, Cetree USM
- Pameran Terbuka di P.P Arkeologi Malaysia

2.00 ptg :

BENGKEL PERUBATAN ALTERNATIF – ' Kristal Healing'

Dr. Hisham Hashim [D'Kasturi Enterprise]

8.30 mlm :

BENGKEL ASTROFOTOGRAFI & PENGGUNAAN PETA BINTANG

Mr. H.E. Lim [' Perseid Telescope ']

9.30 mlm : Persembahan Laser & Cerapan Bintang

Bengkel perubatan alternatif – 'kristal healing'...

HARI KEDUA [21 JUN 2008, SABTU]

PENCERAMAH : Dr. Hisham Hashim [D'Kasturi Enterprise]

Bengkel astrofotografi & penggunaan peta bintang...

HARI KEDUA [21 JUN 2008, SABTU]

Aktiviti sepanjang karnival...

Tentatif Majlis...

HARI KETIGA [22 JUN 2008, AHAD]

9.00 pagi : Pameran dibuka kepada orang ramai

Aktiviti-aktiviti sepanjang hari:

- Pameran Sains Remaja
- Pameran Sains oleh Pertosains – PlaySmart
- Tayangan Filem Cereka Sains
- Pertunjukan Alatan Sains Baru MGTF USM
- Persembahan Planetarium & 'spectroheliroscope'
- Pameran Kostum Cereka Sains oleh RedGuard Creations
- Pencerapan Matahari
- Pameran Alatan Sains Islam – IQRA Garden of Wisdom
- Demo Batik
- Pameran Sains – Manipulasi Tenaga Solar, Cetree USM
- Pameran Terbuka di P.P Arkeologi Malaysia

5.00 ptg : Tamat Pameran

Orchid hybrid named after Raja Perempuan of Perlis

A NEW orchid hybrid was named Aranthera Tuanku Fauziah in honour of the Raja Perempuan of Perlis Tuanku Fauziah Tengku Abdul Rashid.

Bernama reported that Tuanku Syed Sirajuddin named the new hybrid after his consort during a National Orchid Fest and Herbs Identification Contest at Perlis Herbar Park in Sungai Batu Pahat recently.

He also called for indepth scientific research to promote traditional remedies.

He said knowledge on traditional remedies should be preserved for the benefit of the young and future generations.

Tuanku Syed Sirajuddin added it was important to conserve the forests as they were full of priceless "treasures".

A string of activities was lined up for the five-day national orchid festival.

The contest for the best orchid attracted 44 hybrids from all over Malaysia.

The herbs identification contest attracted the participation of some 300 pupils.

Just fantastic: Fadillah (centre) admiring an artwork held by USM acting vice-chancellor Prof Dr Lim Koon Ong while Mohd Noor briefs them on the work.

Science of art goes on show

Some of the works were created in the 1980s

By NIK KHUSAIRI IBRAHIM
north@thestar.com.my

THE science of art is clearly reflected in artist Mohd Noor Mahmud's masterpieces. Application of scientific precision in art is evident in his pieces created over a period spanning two decades - from his earliest works on fabric to his latest creations based on contemporary batik motifs.

Some 50 of his artworks are being exhibited at Tuanku Fauziah Museum and Art Gallery at Universiti Sains Malaysia's main campus in Minden, Penang.

Deputy Science, Technology and Innovation Minister Fadillah Yusof recently opened Mohd Noor's solo exhibition in conjunction with USM's science carnival.

The solo exhibition *Dikir Rambutan Rendang* is open to the public until June 28. It is named after Mohd Noor's village - Kampung Rambutan Rendang in Kelantan.

Mohd Noor, 44, said he felt honoured for being given the opportunity to exhibit his works during a science carnival in a prestigious university.

"I have brought with me 50-odd pieces of artwork, some of which are my earliest works created in the late 1980s," he told newsmen after the opening ceremony recently.

Mohd Noor said most of his works were based on personal experience and perception

with a touch of spirituality that reflected elements of culture, religion and community that invoked special feelings.

Mohd Noor, who holds a degree in fine art from Universiti Teknologi Mara, pursued his Masters degree at Leicester, England, in 1994 where he focused on creating images and objects that carried certain symbols.

Mohd Noor said he was familiar with batik motifs as he was born and raised in Kelantan.

The mono-print and collage techniques applied in his works have almost become a trademark that distinguishes his creations.

Among Mohd Noor's interesting works are the Gua (Cave) series created in 1990s. The works were inspired by combination of nature and culture.

Concentration of elements of nature, coupled with texture and brilliant choice of colours defines the Gua masterpieces.

Museum director Hasul Jamal Saidon said Mohd Noor's works were selected as he hailed from Kelantan which was known as the cradle of the Malay culture.

"The knowledge in science is applied in many forms of artworks from Kelantan. Making of fine jewellery and the keris, for example, reflects how art and science is combined," he said.

For more information, call 04-6533888 or e-mail dir_muzium@notes.usm.my.

Wacky show to promote science

GEORGE TOWN: A reality show on scientists and inventors with wild ideas may debut on television to promote science.

Deputy Science, Technology and Innovation Minister Fadillah Yusof said the aim was to make science as sensational as the entertainment industry.

"Besides scientists and inventors, we also want to draw people with practical ideas to participate in the reality show.

"Cash prizes will be offered to the winners," he said after opening exhibitions on science and art at Universiti Sains Malaysia's Tuanku Fauziah Museum and Gallery here yesterday.

Fadillah said the ministry was discussing the reality show proposal with the ministries of Information and Youth and Sports.

He said his ministry was planning to increase the ratio of scientists and engineers to 60 per 1,000 population by 2010.

Science show: Balik Pulau Mara Junior College students Syafiq Ikhwani Kamarudin (right) and Ammar Hafiz Abd Hamid showing their science project to Fadillah (second from left) at USM's Tuanku Fauziah Museum and Gallery in George Town yesterday. Looking on is USM acting vice-chancellor Prof Dr Lim Koon Ong (left).
